DETAILED ACTION

Response to Amendment

This office action is in response to amendment filed on 3/1/2007. Per this amendment, claims 1, 2, 4-15, 21, 26, and 28 have been amended, claims 16-20, 22-25, and 27 have been cancelled, and claim 28 has been added.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Masuda et al. (US 2001/0005676).

Regarding claim 28, Masuda et al. discloses a radio switching system that comprises the following:

- A Home Location Register (HLR) (managing unit) that registers subscriber information of each mobile subscriber (MS) and determines whether communication is allowed for a MS (page 2, paragraph 41).
- A Mobile Switching Center (MSC) (control unit) that judges whether a subscriber is inside or outside of a home zone (second area) from location information received from the Base Station Controller (BSC) and information from the HLR (page 3, paragraphs 49-51). The MSC also controls the status of the MS by rejecting (incommunicable status) or accepting (communicable status) service (figure 3, items S42, S43).

Masuda et al. does not explicitly disclose a first area where the MSC does not control allowance/non-allowance of communication for a terminal. However, it is obvious to one of ordinary skill in the art at the time the invention was made that in wireless communications systems, a MSC is used to control access for a particular area, and therefore does not control areas that are controlled by other MSCs.

Allowable Subject Matter

6. Claims 1, 2, 5-15, 21, and 26 are allowed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
